Ergo-Handle Carts

The Ergo-Handle Cart is constructed of heavy-duty steel to handle uniform loads up to 4,000 pounds. The patented ergonomic handle decreases fatigue by allowing the operator to easily maneuver the cart. Rolls on 2 rigid, 2 swivel 8" x 2" casters with roller bearings. Invertible bolt-on chrome ergonomic handle designed for individual height comfort and handling of long loads.

Stockpicker Trucks

Combine the mobility of a cart with the versatility of a step ladder with our Stockpicker Trucks. Convenient spring loaded step ladder holds the cart securely in place while a person is standing on the ladder. Crutch tip ladder prevents the cart from moving while stocking. Springs then return the ladder to the raised position once personnel exit the step. All shelves have a 2" lip turned up to prevent items from falling off. Standard casters are 4" x 2" mold-on-rubber, two rigid and two swivel with wheel brakes. Steel units are powder coated blue.

Steel Cantilever Stockpicker Truck

This unique cantilever design allows for oversized packages to fit conveniently on the bottom shelf without restricting access to the packages. Eliminate the need to move around a clumsy ladder and push a cart while trying to stock or unstock shelves. The step ladders are spring loaded to hold the cart securely in place while a person is standing on the ladder. Two rigid and two swivel 4" x 1½" mold-on-rubber casters standard. Total uniform capacity is 440 lbs. per cart, uniformly loaded.

Hi-Duty & Hi-Frame Stockpicker Trucks

These oversized units are perfect for large jobs. Ideal for oversized cartons, boxes, parts, and supplies. A spring loaded ladder for sure, safe climbing, and loading. Steps have non-skid footing with self-cleaning surface. Each unit features three shelves. Standard 4" x 2" mold-on-rubber casters, 2 rigid and 2 swivel with brake. Built of durable steel or aluminum construction. Steel units are powder coated a blue finish.

HANDLE DESIGN MAY VARY FROM WHAT IS SHOWN

(4) 8" x 2" PNEUMATIC CASTERS (CAPACITY 1,200 LBS.), MODEL VHPT-PNU

Plastic Platform Trucks with Fold Down Handle

Tough, high impact-resistant plastic construction is virtually maintenance free. Industrial grade plastic deck will not rust, dent, chip, or discolor. A $\frac{1}{2}$ " lip runs along the perimeter of the deck to help retain cargo. The steel 36" high steel handle folds down for storage. Units roll smoothly on two rigid and two swivel poly-on-poly casters.

MODEL NUMBER	DECK SIZE (W x L)	DECK HEIGHT	UNIFORM STATIC CAPACITY (LBS.)	CASTER SIZE	NET WT. (LBS.)

High Back Aluminum Hand Truck with Push Out

The High Back Aluminum Hand Truck with Push Out will transport tall heavy loads weighing up to 300 pounds from workstation to workstation. When the load has reached its final destination, the user simply pushes down on the back plate with their foot and the plate on the front of the unit will slide the load off. This feature reduces stress on the user's back. 8" x 1¼" semi-pneumatic wheels. Ships knockdown.

Four Wheel Multi-Position Steel Hand Truck

Great for uneven surfaces and outdoor work. 4" x 1¼" mold-on-rubber swivel casters are located at the back of the cart to stabilize loads and prevent tipping. The back casters will also transform the unit into a horizontal platform truck. The unit will lie back horizontally, the handle will release to a standard position, and now the cart is a platform truck. 10" x 3½" pneumatic casters. Ships knockdown.

Steel Stair Hand Truck

Unique design features tandem triple-wheel assemblies that work great when going up and down stairs. Wheel assembly smoothly rotates as you go up or down each step - eliminates the thud and bump associated with conventional two wheel hand trucks on stairs. Rear wheel assembly also allows hand truck to roll easily on 4 wheels while on flat surfaces. Single loop handle. Steel construction.

Traction-Drive Carts

DC POWERED STANDARD

Unique carts feature built-in traction-drive system for easy transportability. Ideal for applications including mail rooms, hospitals, supermarkets, hotels and warehouses. Features 450W electric drive motor with two 70Ah batteries for power. 110V AC internal battery charger is included. Variable throttle speed control for precise maneuvering and positioning is located in the handle. Units roll smoothly on (2) 8" rubber front wheels and (2) 10" pneumatic rear wheels. Walking speed is 0-3.7 mph when unloaded and 0-2.5 mph when loaded. Speed control is conveniently located in handle. Handle pivots back towards operator and includes horn and emergency stop. Maximum incline is 7 degrees. Each shelf includes a non-slip rubber top surface. Includes on-board charger.

Powered Platform Truck DC POWERED STANDARD

High quality battery-powered truck ideal for transporting all sorts of loads in warehouses, hospitals and factories. Red throttle controls infinite speed in forward or reverse, and unit stops when throttle is released. Emergency reverse belly switch; when actuated, instantly reverses direction and moves the unit forward away from the operator until the switch is released. Stable 4 wheel platform. Two 10" pneumatic tires and two 5" poly on steel swivel wheels provide a high degree of maneuverability. Features an anti-slip rugged deck surface. Maximum speed is 1.8 mph loaded and 2.3 mph unloaded. This truck comes with 2, 12V, 40Ah maintenance free batteries, 70A Curtis controller, 370W drive motor, integral battery charger, and battery level gauge. 3-4 hour operation at full charge - 6 hours when used intermittently. Battery recharge time is 8-8.5 hours.

Plastic Dollies

One piece molded polyethylene dollies are lightweight and easy to clean. Will not rot, warp, dent, or splinter like wood dollies. Ideal for the food service industry. Dollies with pull rope includes 1/4" poly rope handle for easy pulling. Model POS-1624 features a molded handle. This allows dolly to be easily carried up and down stairs. Unit comes standard with poly-on-poly casters. Models POS-1830 and POS-2133 roll smoothly on poly-on-poly casters.

Open Deck Machinery Dolly

Dollies have six high-capacity, abrasion-resistant, cast iron steel wheels on fixed axles to move heavy machinery, containers, and other equipment. The center wheels project lower than end wheels for easier pivoting. Welded steel construction. Model ODMD-2436-6 has a 3" channel steel frame; 5" cast iron wheels have roller bearings. Model ODMD-3660-10 has a 6" channel (1¼" flange width) steel frame; 8" x 3" cast iron wheels have roller bearings. Durable powder coat yellow finish.

Low Profile Machinery Dolly

Typically used in pairs or sets of four to move heavy machinery, containers, and other equipment. Deck height is only 1¾" high. Made of all welded steel construction with a ¼" thick deck and ⅝" high lip on two sides to retain loads. Four rigid 2" x ½" steel wheels allow for portability.

Steel Machine Rollers & Accessories

Made of high-strength annealed ductile iron, these Steel Machine Rollers have swivel tops that rotate 360° on chrome steel ball bearings to allow for easier turning. The rollers form a "tank track" to revolve around a center load bearing plate in the frame to provide maximum maneuverability. The weight of the load is transferred directly from the load bearing plate to the rollers, eliminating axle friction and requiring less power to start and move. A spring loaded locking mechanism on the swivel tops, except on model VHMS-2, can be engaged in detents at 45° intervals. These units are virtually maintenance free. Steering bars split in two and connect with sleeve for easy storage.

Machinery Skates

These skates are designed to move heavy equipment and machinery. Nylon wheels are strong and will not mark floors. The top of each skate includes a rubber surface for extra grip. Steel construction with handle to carry and position. Three styles to choose from.

Fixed: Dolly size is nonadjustable and wheels are rigid. Designed primarily for moving in straight lines.

Adjustable: Includes two dollies connected with a slider bar to form one larger dolly. Slider bar allows for adjustable overall dolly width. Designed primarily for moving in straight lines.

Steerable: Each dolly includes a swivel top plate and a pulling bar to allow for easy maneuvering around turns and corners.

Heavy-Duty Cradle Carts

Move and store pipe, channel, bar stock, barrels, or drums with these Heavy-Duty Cradle Carts. A large open design that makes loading and unloading by fork trucks and slings easy. All welded construction. Wheels are mounted in a diamond pattern to allow the truck to tilt when going over thresholds and turn about on its own center. Lightweight Aluminum Cradle Cart fits all small to medium loads and rolls on (4) swivel 3" x 1½" hard rubber casters. The 4,000 & 10,000 pound Steel Cradle Carts rolls on (2) rigid and (2) swivel phenolic casters, except for the DCC-80 which rolls on (4) swivel casters. Powder coat finish standard on steel cart.

Machinery Lifts

These machinery lifts are the ideal method to move bulky and hard to handle loads. Move large, awkward objects or heavy equipment that is difficult to maneuver or position like refrigerators, safes, furniture, or machines. Yet they are versatile enough to safely handle fragile, sensitive equipment like glass, and computers. Optional side straps secure loads for stable moving. Large wheels allow smooth movement over bumps and cracks of factory floors. Forks are adjustable with mounting pegs to allow for positioning of forks to accommodate different width loads.

Adjustable Height Floor Locks

This one of a kind floor lock includes an adjustable height foot pad that will work on carts with different caster heights. The adjustable height feature provides uniform locking and safety unlocking force for better ergonomic operation. This feature also keeps the floor lock working properly as spring and pads wear over time. Height is adjustable by turning the bottom pad. The bottom pad includes suction-cups for extra grip.

Leveling Jacks

Designed for permanent installation, these screw-style jacks hold platforms and other equipment in place and stabilize them at the required height. Drill a 1¹/₄" diameter hole through the platform to be leveled and bolt the platform between the upper and lower flanges of the jack's divided housing. Uniform lifting capacity is 5,000 pounds with a holding capacity of 10,000 pounds. Jacks have an 8¹/₂" long handle that folds down when not in use. 3⁷/₈" diameter swivel base has a slip-resistant rubber pad on the bottom (replacement pads available). Screw diameter is 1¹/₄". Lift rate is 1¹/₄" per crank revolution.
